A note on the identity of *Spirostreptus acutus* Karsch
(Spirostreptida: Odontopygidae)

By Richard L. Hoffman

ABSTRACT

Examination of the male holotype of *Spirostreptus* (*Odontopyge*) *acutus* Karsch, 1881, a species never placed in a modern genus since its description, shows it to be referable to *Kompsoptrium*, of the Congo-Angola region. Uncertainty about the type locality induced previous mislocation in Mozambique; it is actually in central-western Angola.
